Saturday 15. 12. '79

Opening session

9. a.m.

Speakers

1) Dr. Hafiz EI Shazali.
   President of the Union & Sudan association of Paediatricians

2) Prof. I Dogramachi.

3) Sayed Khalid Hassan Abbas
   H. E. Minister of Health.
SATURDAY 15. 12. 1979
11 — 12. 15 a.m.

PANEL 1

Blood Disorders (1)

Chairman : Professor Bagchi
Reporteur : Dr. M. A/Mageed

Speakers :
1. Dr Kattamis, C. and Others.
   Effectiveness of Splenectomy in thalassemic syndromes
2. Dr. M. A/Mageed and others
   Value of Serum Ferritin in Sickle Cell Disease.
3. Dr. Ahmed Hamid Ali & Prof. A. Omer
   Pattern of Red Cell destruction in children with Bilharzia spleenomegaly.

DISCUSSION 15 minutes.

PANEL 2

Protein Calorie Malnutrition (1)

Chairman : M. Ibrahim
Reporteur : Dr. O. A/Elseed

Speakers :
1. Dr. Hakton M. and others
   Hydroxy protein values in normal infants.
   Protein energy malnutrition and nutritional rickets before and after vitamin D. Therapy.
2. Dr. F. El Behairy
   Lactose tolerance in normal infants and children and in iases of Protein Calorie malnutrition.

DISCUSSION 15 minutes.
SATURDAY 15. 12. 1979

11 — 12. 15 a. m.

PANEL 3

MISCELLANEOUS TOPICS.

Chairman      : Prof. Waterloo
Reporteur     : Dr. Omer Mohamd Ahmed Taha

Speakers:

1. Dr. S. Sklavanu-Zurukzogler and others.
   Youngester's Psychological reaction after an earthquake.

2. Dr. Hafiz el Shazali
   Value of Virazole in treatment of measles.

3. Dr. Z. A. Karrar & Dr. M. I. A. Omer
   Morbidity Patterns in Soba-Butri project.

4. Dr. Mahmoud Mohamed Hassan and Fadil Rabie
   Inborn errors of metabolism of amino acids in Sudanese Children.

DISCUSSION     15 minutes.
SATURDAY 15.12.1979
12.30 - 2 p.m.

PANNEL 1

BLOOD DISORDERS (II)

Chairman: Ahmed Hamid
Reporteer: Dr. Osman Awad el Karim

Speakers:
1. Dr. Catrice, D. et al
   Evaluation of auditory and renal function in Patients with SS disease and S. thalassemia.
2. Dr. Ahmed Hamid and others.
   Sideropenic dysphagia in two Sudanese children.
3. Dr. Cassimos, Ch. and others
   D. glucaric acid excretion in families of normal and G-6 PD deficient children with favism.

DISCUSSION 15 minutes.

PANNEL 2

PROTEIN CALORIE MALNUTRITION (II)

Chairman: Prof. Scrimshaw
Reporteer: Dr. Mohamed Abdalla Malik

Speakers:
1. Dr. Sulieman S. Fedail and Dr. Z. A. Karrar
   Serum trypsin and cholecystokinin protein-calorie malnutrition.
2. Dr. Ali Karrar
   Effect of different diet regimen in hospitals on catch up growth period in Sudanese malnourished children.
3. Dr. Mabyio Mustafa and others
   Treatment and prophylaxis of endemic goitre in children by iodized oil in Jebel Marra area.

DISCUSSION 15 minutes.
SUNDAY 15.12.1979

12.30 - 2 p.m.

PANEL 3

MISCELLANEOUS

1. Results of chromosome studies in cases of live infant syndrome.
2. Granulomatous hepatitis.
3. Lupus Band test in children.
4. Follow-up in hemochromatosis in Turkish boys.

DISCUSSION

15 minutes.
PLENARY SESSION

8 — 10 a. m.

INFANT AND CHILD FEEDING (1)

Chairman: Prof. Mamdouh Gabr
Reporteur: Dr. Yahia. Omer Hamza

Speakers:

1. Prof. Waterloo

2. Professor Z. L. Ostrawski

   Breast feeding in four European countries
SUNDAY 16. 12. 1979

11 a. m. - 12. 15 p. m.

PANNEL 1

GASTRO-ENTROLOGY (1)

Chairman : Prof. Tapias Ioanis
Reporteur : Dr. Yassin A/Turki

Speakers :

1. Dr. Saler R. and others
   A study of hepatitis B surface antigen and serum immunoglobulins in Egyptian veno-occlusive disease.

2. Dr. M. N. Mansour
   Development of albumin binding capacity to bilirubin during the first 14 days extra uterine life in preterm infants.

3. Dr. Salah Taha
   Caeco colic intussusception in the Gezira

4. Dr. Mahmoud Mohamed Hassan
   Acute gastroenteritis in Sudanese children

DISCUSSION 15 minutes.

PANNEL 2

CARDIOVASCULAR SYSTEM

Chairman : Prof. Sklvomou Tsouroukis
Reporteur : Dr. A/Moneim el seed

Speakers :

1. Dr. K. Kossoglu and others
   Blood pressure in children aged 4 - 18 years.

2. Dr. El Seed A. M.
   Congenital Heart disease in Sudan

3.

4.

DISCUSSION 15 minutes.
SUNDAY 16. 12. 1979

11 a. m. - 12. 15 p. m.

PANNEL 3

GROWTH AND DEVELOPMENT

Chairman : Prof. Lamaan Zaki
Reporteur : Dr. El Sir Hashim

Speakers :

1. Dr. A. Khattab
   Comparative anthropometric studies of Egyptian Emerate and Indian children.
2. Dr. T. Shibli
   Gestational assessment in Sudanese newborns.
3. 
4. 

DISCUSSION 15 minutes.
PANNEL 1

GASTROENTROLOGY (11)
Chairman: Prof. Ostrowski
Reporteur: Dr. Gaafar Ibnoaf Sulieman

Speakers:
1. Dr. A. Haidas and Cassinos Ch.
   Immunologic defects in children with chronic diarrhoea
2. Dr. Yahia O. Hamza and Others
   Northward spread of visceral leishmariasis in Sudan
3. Dr. Gaafar Ibnoaf Sulieman
   Small intestinal morphology in Sudanese children.

DISCUSSION 15 minutes.

PANNEL 2

IMMUNIZATON
Chairman: Prof. S. Sklavunu
Reporteur: Dr. Mohamed Ibrahim

Speakers:
1. Dr. K. Kiossoglu
   Immunization of Pre-school and school age children
2. Dr. M. I. Ali Omer
   Trial of multiple immunization programme in Khartoum.

DISCUSSION 15 minutes.
SUNDAY 16. 12. 1979
12. 30 - 2 p. m.

PANNEL 3

MISCELLANEOUS

Chairman:
Reporteur:
Speakers:

1. 
2. 
3. 
4. 

DISCUSSION 15 minutes.
PLENARY SESSION

INFANTS AND CHILD FEEDING (II)

Chairman: Prof. Kassimos Gliristos
Reporteur: Dr. A/Moneim el Seed

Speakers:

1. Professor N. S. Scrimshaw
   Interaction of nutrition and infection in children
   Professor K. Bagchi
   Dr. Hafiz el Shazali
PANNEL 1
DISEASE OF CENTRAL NERVOUS SYSTEM
Chairman: Prof. Mansvo
Reporteur: Dr. A/Rahman el Mufti

Speakers:
1. Dr. Frezal and others.
   Diagnostic clinique des encephalopathies hereditaires consécutives à une aminoacidopathic
2. Dr. Toptas J. N/ et N. Kordiolis
   Le traitement chirurgical des malformations arterio-veineuses cérébrale, de l'enfant et le l'adolescent.
3. F. El Behairy and others
   Some enzyme and electrolyte studies in serum and CSF of rheumatic fever and chorea children
4. Dr. Mustafa Abdalla & Mohamed Ibrahim A. Omer
   A new type of muscular dystrophy

DISCUSSION 15 minutes.

PANNEL 2
RESPIRATORY DISORDERS
Chairman: Prof. Cruiz
Reporteur: Dr. A. Bakkar

Speakers:
1. B. Jean and others
   Bronchiolites Du Levolutives etude anatomopathologique
2. Giogarakis Th and others
   A survey of childhood Asthma in Patros (Greece)
3. 
4.

DISCUSSION 15 minutes.
MONDAY 17. 12, 1979

11 - 12. 15 a. m.

PANNEL 3

MISCELLANEOUS

1.

2.

3.

4.

DISCUSSION 15 minutes.
MONDAY 17. 12. 1979
12. 30 - 2 p. m.

PANNEL 1

RENAL DISEASES

Chairman : Prof. Alex Roberston
Reporteur : Dr. M. N. Mansour

Speakers :
1. Dr. Ketil Malaka and others
   Antibody coated bacteria in urinary tract infections in children.
2. 
3. 
4. 

DISCUSSION 15 minutes.

PANNEL 2

PAEDIATRIC SYNDROMES

Chairman : Dr. Mahmoud Mohd. Hassan
Reporteur : Dr. Khalda Zahir

Speakers :
1. Dr. W. Zurukzoglu and others
   Some remarks on Alport syndrome interesting to the paediatricians.
2. Dr. P. Monnet and others
   Syndrome De Reiter Chezdes Enfant en convexion avec une infection a mycoplasma ting.
3. 
4. 

DISCUSSION 15 minutes.
PANNEL 3

MISCELLANEOUS

Chairman : 
Reporteur : 

Speakers :
1. 
2. 
3. 
4. 

DISCUSSION 15 minutes.
PLENARY SESSION

PAEDIATRIC SERVICES : PRIORITIES AND CHALLENGES

Chairman : Professor I. Dogramachi
Reporteur : Dr. Osman Awad el Karim

Speakers :

1. Professor Dogramachi
2. Professor Shah
3. Dr. M. I. Omer

11 - 12. 15.

Guest Lecture

Professor Alex Robertson

12. 30 - 2 p. m.

Closing session

Chairman : Dr Hafiz el Shazali
Reporteur : Dr. Abo Obeida Magzoub.
Colistop stops diarrhoea

The acute symptoms of diarrhoea will generally be controlled within 24 hours of the initiation of treatment. It is advisable to continue for a period of 2 days after the clinical symptoms have resolved. If no satisfactory response is observed within 24 hours of treatment other measures should be considered.
BABYRHINOL®
syrup

minimizes the discomfort due to common colds

Babyrhinol has been adapted to the needs of young patients as regards composition: it contains an antipyretic, a decongestive and an antihistamine; dosage: perfectly calibrated for maximum effectiveness and tolerance; taste: pleasant,*
administration: easy, one dose every 4-6 hours.

* For this reason the product should not be left within reach of children.

AVERAGE DOSAGE
Children weighing up to 6 kg: half measureful every 6 hours.
Children weighing 6 to 10 kg: half measureful every 4 hours.
Children weighing 10 to 20 kg: one measureful every 6 hours.
Children over 20 kg: one measureful every 4 hours.
The product should not be administered for more than 10 consecutive days.

COMPOSITION
1 ml contains: phenylpropanolamine hydrochloride 2 mg; chlorprophenyridamine maleate 0.15 mg;
acetylpaminophenol 24 mg.
A measureful holds 5 ml of syrup.

PACKING
Bottle of 120 ml.

GRUPPO LEPETIT S.p.A. MILAN (ITALY)
Hiconcil* invites compliance

(amoxicillin trihydrate)

Broad bactericidal coverage of the most commonly encountered pathogens

Excellent absorption from the G.I. tract... even in the presence of food

Convenient T.I.D. dosage regimen encourages compliance

Low incidence of side effects

A wide range of dosage forms and strengths

from Mead Johnson Laboratories

When outpatient therapy requires inpatient blood levels
Rhinitis  Common cold  Influenza

similar concept: quick symptomatic relief in
tviral and allergic upper respiratory tract disease

MAKE SURE IT'S SEPTRIN

...because Septrin makes sure in bacterial infections

There is no substitute for experience. Can imitators stand up to close comparison? Consider these facts. SEPTRIN is the result of carefully planned Wellcome research. Manufactured to the highest standards, fine particles of the active ingredients are evenly dispersed throughout the tablet to ensure even absorption. Backed by the wealth of clinical and scientific evidence you can be sure of SEPTRIN in respiratory infections, urinary tract infections and gastro-intestinal infections including typhoid and paratyphoid.

Available as Tablets and Paediatric Suspension.

Contact with contaminated water, a potential source of bilharziasis

In the treatment of bilharziasis

Ambilhar® CIBA is highly effective

Active in both *S. haematobium* and *S. mansoni*.
Exceptionally well tolerated by children.
Therapy of choice for mass treatment in schools.

Highly suitable for treatment of ambulatory patients.
Well tried, well documented, and well proven.
Taken orally in an easy daily dosage.

500 mg. tablets for adults 100 mg. tablets for children
What is new for the newly diagnosed diabetic?

Glibenese

— a new “second-generation” oral sulphonylurea

INSULIN SECRETION WHEN

THE DIABETIC PATIENT NEEDS

IT MOST after meals

1. GLIBENASE produces high insulin levels rapidly in response to a glucose load

2. Plasma insulin levels decline rapidly as the glucose challenge diminishes

3. GLIBENASE achieves prolonged sensitization of pancreatic beta cells with a single dose, thus permits once-a-day or bid dosage

- Provides prompt insulin response but not unduly prolonged
- Acts promptly and predictably because absorption is rapid and complete
- Is rapidly excreted, avoids problems of accumulation
- Shows no tendency to increase body weight
- Convenient single daily dose up to 2 tablets (10 mg)
- Ensures high degree of efficacy and tolerance
- No antabuse effect observed

Glibenese

Glibenese is Pfizer brand of glipizide. Available as white oblong scored 5 mg tablets in convenient blister packs.
Many adolescents often need a little help to develop good nutritional habits. Your counsel, proper food, and the effect of PERIACTIN—a unique agent to enhance food intake in underweight adolescents—may help.

In 58 young patients treated with PERIACTIN, Silbert* reported “marked weight increase with minimal side effects.”

Typically, increased food intake is noted after the first week. And when optimal weight gain is achieved—usually in only 30 to 60 days—PERIACTIN may be withdrawn with no further drug effect.

Not a hormone or steroid, PERIACTIN has not been reported to affect endocrine function—nor have there been reports of virilization or premature epiphyseal closure.

Transient drowsiness, sometimes noted in the first few days of therapy, is the most frequently reported side effect.

Detailed information is available to physicians on request.

For infants and young children

Cliacil®
Phenoxymethyl penicillin potassium

Oral suspension

- Well tolerated
- Rapidly absorbed
- Reaches effective therapeutic concentration within a short time

Indications:
Tonsillitis, bronchitis, bronchopneumonia, otitis media, sinusitis, boils, abscesses, cellulitis, erysipelas, scarlet fever.

Special notes:
In patients with gastric or intestinal conditions associated with vomiting and diarrhoea, adequate absorption of oral penicillins cannot be relied upon. Allergic reactions are less common in patients receiving Cliacil by mouth than in patients receiving parenteral penicillin G.

Presentation:
50 ml/3 million I.U.

Parasites in Man

Pfizer is committed to the prevention and eradication of one of the major problems facing mankind today—parasitism. Towards this end Pfizer research has contributed to the development of safe, effective and reliable antiparasitic agents that are being used in treatment programs throughout the world.

First,

**Combantrin**

(pyrantel pamoate) — Single-dose broad spectrum anthelmintic

Then,

**Fasigyn**

(tinidazole) — Single-dose in trichomoniasis & giardiasis
— Single daily dose x 2 - 3 days in amoebiasis.

Now... New From Pfizer

**VANSIL**

(oxamniquine) — The new oral therapy for schistosomiasis due to *S. mansoni* — safe, effective, simple, unique.

*Pfizer*
